1. Product Vision

Create an Ethiopia-first Pay-Later product that lets eligible customers buy from participating online and physical merchants, including small shops, while using approved existing payment channels for first/future payments. The product must make the responsible decision and current payment state obvious to customers and merchants.

2. Product Principles

- KYC is not credit approval.
- New customers earn controlled trust; do not assume a high initial limit.
- Merchant release follows authoritative conditions, not optimistic UI.
- Small merchant flows are first-class, not a later adaptation.
- One customer account can show obligations paid through different supported rails.
- Every financial state has a clear pending/failed/reconciled path.
- Provider-specific limitations are visible in configuration and operations.

3. Personas

Persona	Primary Goal
Customer	Use Pay-Later, payments, history, support
Merchant Owner	Manage merchant, branches, staff, sales, refunds/reports
Merchant Manager	Operational merchant management
Merchant Employee	Create/view branch sales and QR
Finance Officer	Payments, reconciliation, settlements, refunds
Risk Officer	Eligibility/risk review, limits, fraud review
Compliance Officer	KYC/KYB, complaints, regulatory evidence
Customer Support	Tickets, assisted troubleshooting
Operations Officer	Provider incidents, transaction operations

4. Customer Journey

- Onboarding and phone verification
- Identity/KYC
- First-time eligibility outcome
- Home with approved/available amount
- Merchant discovery or QR/merchant-assisted sale
- Purchase details and transaction decision
- Offer/plan selection
- Clear disclosures/consent
- First payment when required
- Merchant release/confirmation
- Installment tracking and repayments
- Refund/dispute/support where needed
- History informs future limit review

5. Merchant Journey

1. Register business and owner
2. Business verification and settlement details

3. Create branches/employees
4. Use Quick Sale/catalog/enterprise integration
5. Enter amount/customer or generate transaction QR
6. Receive eligibility/transaction result
7. Wait for required first-payment SUCCESS
8. Release goods/service on approved state
9. View transaction/refund/settlement status
10. Resolve disputes and reconcile reports

6. Admin Journey

- Review KYC/KYB and manual eligibility.
- Investigate fraud/disputes/payment exceptions.
- Monitor provider health, payments and reconciliation.
- Operate settlements/refunds under separation of duties.
- Manage versioned configuration with approval/audit.
- Support complaints with SLA and evidence.

7. Feature Catalogue

ID	Feature	User	Problem Solved	Expected Behavior	Success Criteria	Failure Cases	Priority
AUTH-001	Registration	Customer	Create a secure customer account using verified contact information.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete registration correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
AUTH-002	Login	Customer / Merchant / Admin	Authenticate returning users with role-appropriate controls.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete login correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
AUTH-003	OTP	Customer / Merchant	Verify possession of a phone number and sensitive actions.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete otp correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CUS-001	Customer Profile	Customer	Maintain identity, contact, preferences and account status.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete customer profile correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
KYC-001	Identity Verification	Customer / Compliance	Verify identity before Pay-Later eligibility.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete identity verification correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
KYC-002	Fayda Verification	Customer / Compliance	Use Fayda/accepted digital identity only if legally and technically available.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete fayda verification correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
MER-001	Merchant Registration	Merchant Owner	Create merchant account and capture business information.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete merchant registration correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
MER-002	Business Verification	Merchant / Compliance	Verify merchant legitimacy before BNPL transactions.	State-driven, auditable, safe retry; provider-dependent paths	User can complete business verification correctly and see	Validation, unauthorized, duplicate, dependency	MVP

				enabled only when available.	final/pending state.	outage, risk hold, manual review.	
MER-003	Branch Management	Merchant Owner / Manager	Manage merchant branches and operating status.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete branch management correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
MER-004	Employee Management	Merchant Owner / Manager	Invite, role and deactivate merchant employees.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete employee management correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
MER-005	Product Management	Merchant	Maintain optional catalog for merchants that need it.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete product management correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
MER-006	Quick Sale	Merchant	Create a sale from description + amount without full catalog/POS.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete quick sale correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
QR-001	Merchant QR	Merchant / Customer	Start a merchant-linked checkout by QR.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete merchant qr correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
QR-002	Transaction QR	Merchant / Customer	Open a specific sale safely using short-lived QR.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete transaction qr correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
DISC-001	Merchant Discovery	Customer	Find participating merchants and categories.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete merchant discovery correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
CRD-001	Customer Eligibility	Customer / Risk	Determine whether Pay-Later is available responsibly.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete customer eligibility correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CRD-002	Credit Limit	Customer / Risk	Manage approved, available, reserved and restricted exposure.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete credit limit correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CRD-003	Transaction Decision	Customer / Risk	Reassess each purchase even when a customer has a limit.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete transaction decision correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CRD-004	First-Time Eligibility	Customer / Risk / Credit Partner	Approve, restrict, request information, review or decline first use without relying on internal history.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete first-time eligibility correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CRD-005	Limit Graduation	Risk	Review future limits using repayment and affordability evidence.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete limit graduation correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
CRD-006	Offer Engine	Customer / Risk	Return responsible alternatives such as higher down payment or lower financed amount.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete offer engine correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
BNPL-001	Pay-Later Purchase	Customer / Merchant	Create an approved installment purchase.	State-driven, auditable, safe retry; provider-	User can complete pay-later purchase correctly and see	Validation, unauthorized, duplicate,	MVP

				dependent paths enabled only when available.	final/pending state.	dependency outage, risk hold, manual review.	
BNPL-002	Installment Plans	Customer	Present configurable schedules and total-payable disclosure.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete installment plans correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
BNPL-003	First Payment	Customer	Collect required initial payment before activating financing/release.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete first payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
BNPL-004	Flexible Down Payment	Customer	Allow a larger upfront payment without increasing approved credit.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete flexible down payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
PAY-001	Payment Method Selection	Customer	Choose an available, supported repayment method.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete payment method selection correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
PAY-002	Telebirr Payment	Customer	Initiate/confirm Telebirr payment using verified public/commercial capability.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete telebirr payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP*
PAY-003	CBE Birr Payment	Customer	Support CBE Birr only through confirmed provider/gateway arrangement.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete cbe birr payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP*
PAY-004	M-PESA Ethiopia Payment	Customer	Support M-PESA Ethiopia through confirmed provider/gateway arrangement.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete m-pesa ethiopia payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP*
PAY-005	Bank Payment	Customer / Finance	Accept supported bank payment rails with reference/reconciliation controls.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete bank payment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
PAY-006	Payment Gateway	Customer / Platform	Use licensed gateway to reach multiple Ethiopian payment methods.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete payment gateway correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
PAY-007	Payment Confirmation	Platform	Authoritatively confirm provider outcome and post financial effects once.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete payment confirmation correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
PAY-008	Payment Retry	Customer / Platform	Retry safely using idempotency without double charging.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete payment retry correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
PAY-009	Automatic Repayment	Customer / Platform	Auto-collect only with explicit mandate/provider support.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete automatic repayment correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Later
PAY-010	Payment Reminders	Customer	Notify before/during overdue according to policy.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete payment reminders correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
PAY-011	Failed / Pending Payment	Platform / Support	Handle FAILED separately from PENDING/UNKNOWN.	State-driven, auditable, safe	User can complete failed / pending	Validation, unauthorized,	MVP

				retry; provider-dependent paths enabled only when available.	payment correctly and see final/pending state.	duplicate, dependency outage, risk hold, manual review.	
COL-001	Overdue Payments	Customer / Risk / Support	Apply reminders, restrictions, review and responsible collections.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete overdue payments correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
COL-002	Restructuring / Hardship	Customer / Support / Credit Partner	Support approved repayment arrangements/restructuring.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete restructuring / hardship correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Later
REF-001	Refund	Customer / Merchant / Finance	Reverse eligible purchase value and adjust obligations.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete refund correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
REF-002	Partial Refund	Customer / Merchant / Finance	Adjust a portion without corrupting schedule or ledger.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete partial refund correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
SET-001	Merchant Settlement	Merchant / Finance	Pay merchant according to agreed model and track status.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete merchant settlement correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
FIN-001	Fees	Finance / Admin	Configure lawful fees without hard-coding.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete fees correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
HIS-001	Customer History	Customer / Risk	Show and use verified purchase/repayment history.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete customer history correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
RPT-001	Merchant Reports	Merchant	Provide sales, BNPL, refund, fee and settlement reporting.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete merchant reports correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
RPT-002	Customer Reports	Customer	Provide purchases, payments, due dates and statements.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete customer reports correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
RSK-001	Fraud Detection	Risk / Compliance	Detect identity, account, merchant, transaction and refund fraud.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete fraud detection correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
DSP-001	Disputes	Customer / Merchant / Support	Investigate financial and merchant disputes with evidence.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete disputes correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
SUP-001	Customer Support	Customer / Support	Track assistance, attachments, escalation and resolution.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete customer support correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
ADM-001	Admin Platform	Admin Roles	Operate customers, merchants, finance, risk, support and configuration.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete admin platform correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP

IAM-001	Roles & Permissions	All privileged roles	Apply least privilege and separation of duties.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete roles & permissions correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
AUD-001	Audit Logs	Compliance / Audit	Record significant financial/admin state changes immutably.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete audit logs correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
ENT-001	Enterprise Merchant Connection	Enterprise Merchant	Connect approved enterprise POS/e-commerce systems.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete enterprise merchant connection correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	Should
RPT-003	Management Reporting	Management	Track GMV, repayment, overdue, fraud, revenue and operational health.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete management reporting correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CFG-001	System Configuration	Authorized Admin	Version and approve plans, limits, fees, provider settings and policies.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete system configuration correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CMP-001	Terms & Consent	Customer / Compliance	Record exact terms/offer/privacy consent versions.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete terms & consent correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
CMP-002	Complaint Management	Customer / Support / Compliance	Manage complaints, SLA evidence and regulatory escalation.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete complaint management correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
REC-001	Reconciliation	Finance / Operations	Compare provider, bank, settlement and internal ledger records.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete reconciliation correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP
SEC-001	Device & Session Security	All users	Protect sessions, devices, tokens and high-risk actions.	State-driven, auditable, safe retry; provider-dependent paths enabled only when available.	User can complete device & session security correctly and see final/pending state.	Validation, unauthorized, duplicate, dependency outage, risk hold, manual review.	MVP

8. First-Time Eligibility Experience

This is a separate product feature, not a hidden score. A new user can be VERIFIED for identity and still be ineligible for credit.

Outcome	Customer Experience	System Meaning
APPROVED_STARTER_LIMIT	Shows a modest available amount and eligible plans.	Credit partner/policy approves reusable starter exposure.
APPROVED_TRANSACTION_ONLY	Shows approval only for current purchase.	No reusable limit is promised.
APPROVED_WITH_DOWN_PAYMENT	Shows higher first payment and reduced financed balance.	Risk is acceptable only at lower financed exposure.
MORE_INFORMATION_REQUIRED	Explains what additional evidence is needed.	No financing activated.
MANUAL_REVIEW	Shows review state and avoids false promises.	Human/partner decision required.
DECLINED	Clear non-approval and support/notice path as required.	No financed exposure.
TEMPORARILY_BLOCKED	Explains that service is unavailable pending risk/security review.	Fraud/device/identity condition prevents decision.

9. Example 2,000 ETB Pay in 4

1. Customer requests a 2,000 ETB purchase.
2. Platform checks customer and transaction eligibility.
3. Approved plan shows 500 ETB first payment + 3 × 500 ETB later (illustrative).
4. Customer accepts disclosures and pays first 500 ETB.
5. If provider says SUCCESS, plan activates and remaining financed exposure is 1,500 ETB; merchant can receive release confirmation.
6. If provider says PENDING/UNKNOWN, customer and merchant see waiting/reconciliation status; no release.
7. If FAILED, customer can retry safely or choose another supported method.

10. MVP Definition

Must Have	Should Have	Later
Registration/OTP/KYC	Merchant discovery	Automatic repayment/mandates
First-time eligibility	Flexible higher down payment	Automated restructuring
Credit limit + transaction decision	Enterprise integration	Advanced ML risk
Merchant app + Quick Sale + QR	Product catalog	Nationwide rollout
Pay-in-4/configurable plan	Partial prepayment	Complex loyalty/rewards
Gateway + confirmed payment methods	Direct provider integrations	Offline credit approval
Payments/pending/retries	Management analytics depth	Advanced personalization
Refunds/settlements/reconciliation	Fayda direct integration if confirmed	Broad multi-credit-partner marketplace
Admin/risk/fraud/support	Additional languages
